

Scottish Powerlifting AGM report 2022

Scottish powerlifting continues to promote and develop powerlifting in Scotland, after a 2 year lull due to Covid we maintained a solid membership base and hosted competitions when government guidelines allowed, for which we maintained and implemented appropriate safety levels.

At this current time we have 425 members, with a significant increase expected as we release second half of the year competition dates, we expect to reach 500 members which will be a record amount for us.

In light of above we at Scottish Powerlifting take pride in developing great athletes, for which we are now seeing success at National and International level, I am sure this trend will continue to grow.

We hosted the British Ladies classic championship this year, which although challenging was a great success, we had encouraging feedback which was comforting. There were areas we have to work on and hope to host another championship with improvements in place.

Going forward Scottish powerlifting will continue to promote the sport, with our primary aim to create and implement a safe enjoyable environment for athletes.

Thank you

Bernie McGurk

Director for Scottish Powerlifting
