

Statement from the Board of Directors – 28th April 2025

GBPF wishes to acknowledge that in recent years, the nature and style of some communications to its membership has not measured up to the standards we hold ourselves to. We are sorry for this and for any upset it has caused.

We have identified a number of actions which we will be taking to prevent reoccurrences and strengthen trust with our membership. These actions include developing clearer mechanisms and channels through which we encourage two-way conversations and space for our valued members to raise concerns.

In July 2024, we stated that an athlete had not complied with the Code of Conduct for International Lifters. As part of the above series of communications, we formally retract this statement.
